

Reminiscences of a Stock Operator - Edwin Lefèvre

A fascinating story about the life of Edwin Lefevre - the one of the most successful traders at the stock exchange of the last century. The book is written in the 20s of the 20th century and has long been a classic of exchange game. In spite of such significant age of the book, it still enjoys wide popularity among traders, since it in a simple and ironic form contained many real advices on the psychology of the market and trading techniques in various situations. Unlike most books on investing, this work looks more like an artistic story than a textbook, for this reason it is easy to read with great interest.
