

TDI-With Alerts is a hybrid indicator that helps traders to understand trend direction, market strength and market volatility. Also the indicator gives a signal to open positions and gives an advice on their direction.

The lines notation:

- Green line - the line RSI price.
- Red Line - the trading signal line.
- Blue Line - the market volatility.
- Yellow line - the baseline market.

Conditions for position opening:

- Scalping - long position = green line above the red, short = red over the green.
- Active - long position = green line above the red and yellow lines, short = red line over the green and yellow lines.
- Moderate - long position = green line above the red, yellow, and the "50" line, short = red line over the green, yellow and green under the "50" line.

Conditions of closing the position:

- Long position - green line intersects with a red bottom.
- Short - green line intersects with a red above.
