

Order modification is changing of levels of stop loss and take profit.

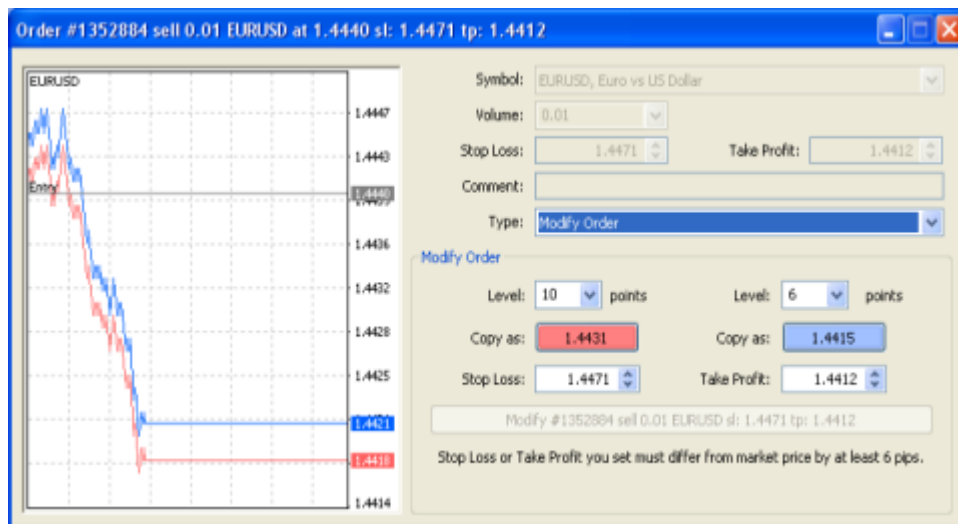

You can modify the deal in a similar way to the closing of the deal, but with some differences. You can modify the deal in the bottom menu of the trading terminal. It identifies your balance, funds and free funds that you can open the deal. If a deal is open, it will be visible in the trading window.

An open deal can be modified by calling the window to modify the deal. You can do this by clicking on it once the right mouse button or selecting "Modify or Delete Order".

After clicking on the menu item "Modify or Delete Order" you'll see the following window:

In this the trading window you can enter new values for the stop loss or take profit:

The screenshot shows a trading window titled "1.4440 tp: 1.4381". On the left is a price chart for EURUSD with a grid. The y-axis ranges from 1.4414 to 1.4447. A red line represents the price movement, starting at 1.4440 and ending at 1.4381. A blue line represents the order's stop loss at 1.4471. On the right, the "Modify Order" section shows the following details:

- Symbol: EURUSD, Euro vs US Dollar
- Volume: 0.01
- Stop Loss: 1.4440
- Take Profit: 1.4381
- Type: Modify Order
- Level: 10 points
- Copy as: 1.4426
- Stop Loss: 1.4440
- Take Profit: 1.4381

At the bottom, a message states: "Stop Loss or Take Profit you set must differ from market price by at least 6 pips."

You can enter new values there. For example we want to increase the stop loss and take profit by 10 points:

1.4440 tp: 1.4381

Symbol: EURUSD, Euro vs US Dollar

Volume: 0.01

Stop Loss: 1.4440 Take Profit: 1.4381

Comment:

Type: Modify Order

**Modify Order**

Level: 10 points Level: 10 points

Copy as: 1.4423 Copy as: 1.4403

Stop Loss: 1.4450 Take Profit: 1.4371

Modify #1353202 sell 0.01 EURUSD sl: 1.4450 tp: 1.4371

Stop Loss or Take Profit you set must differ from market price by at least 6 pips.

You can modify the deal in the case that the new values of the stop loss and take profit will not be too close to the current value of course (no closer than 6 pips), otherwise the modification button will be inactive.

Please note - the "Change #....» button is active. Now if you click on it once, the levels of stop loss or take profit will change their value and their position on the chart.

Here presented schedules of change of exchange rates before and after modification.

The first schedule displays levels of stop loss and take profit before modification:

The second schedule displays levels of stop loss and take profit after modification:

Please note that the Stop Loss and Take Profit levels have changed their position relative to the opening level of the position. In this case, they were relegated from the opening level of the position. This means that we have increased the expected profit and raised the possible loss at the close of the deal when the rate will reach these levels.
