

Forex Symbol «Swiss Franc vs Hungarian Forint» or «CHF/HUF»

CHF/HUF is not a very popular currency pair in the Forex market. CHF/HUF is the cross rate against the U.S. dollar. Although the U.S. Dollar obviously is not present at this currency pair, it still has a significant influence on it. This can be seen, if you combine two charts: USDCHF, USDHUF. By combining these two charts in the same price chart, you can get an approximate CHF/HUF chart.

The U.S. dollar has a significant influence on both currencies. For this reason it is necessary to take into account the major U.S. economic indicators for the correct prediction of a future course of this financial instrument. These indicators include: the discount rate, GDP, unemployment, new created workplaces indicator and many others. It is necessary to note that discussed currencies could respond with different speed on changes in the U.S. economy, therefore, CHF/HUF currency pair may be a specific indicator of change at these currencies.

The economic situation in Switzerland remains high for several centuries. For this reason, the Swiss Franc enjoys great confidence all over the world as one of the most reliable and stable world currencies. The Swiss franc is also a kind of safe haven for capital investment during the crisis. Therefore, in times of crisis, when capital is urgently forwarded to Switzerland, the Swiss franc rises sharply against other currencies. This feature of Swiss economy should be taken into account when you trade with this trading instrument.

The course of this trading instrument was pegged to the Euro since its introduction into circulation in most countries of the European Union until 2008, when Hungary refused to anchor its currency to the Euro due to the absence of further benefit in that.

Hungary is a country with a high proportion of foreign capital in the economy. For this reason, the Hungarian economy is highly dependent on those organizations and countries that operate in the territory of this Central European state.

Hungary is an advanced industrial country in Central Europe. The main economic sectors in Hungary are engineering, metallurgy and chemical industry. Also Hungary has a very developed agriculture, a significant proportion of which are gardening and wine-making industries. Much of the products are exported abroad. A significant proportion of Hungarian income is international tourism. Millions of foreigners visit this country annually, because they are attracted by the nature of the country and its ancient traditions and architecture. Hungary's main trading partners are EU countries and Russia. For this reason, when you assess the further course of the Hungarian forint, you should pay special attention to economic indicators of these regions.

This trading instrument is relatively illiquid if we'll compare it with major currency pairs, such as: EURUSD, USDCHF, GBPUSD and USDJPY. Therefore, when you make a prognosis for the financial instrument, you should primarily focus on those currency pairs that include a U.S. dollar in tandem with each of the considered currencies.

If you trade cross rates, it is necessary to remember that brokers are usually set a higher spread than the more popular currency pairs, so before you start working with the cross-rates, it should be carefully acquainted with the conditions offered by the broker to trade with specified trade instrument.
