

Forex Symbol «New Zealand Dollar vs Norway Kroner» or «NZDNOK»

NZD/NOK is not very popular currency pair at the Forex market. NZDNOK is the cross rate against the U.S. dollar. Although the U.S. Dollar obviously is not present at this currency pair, it still has a significant influence on it. This can be seen, if you combine two charts: NZDUSD USDNOK. By combining these two charts in the same price chart, you can get an approximate NZDNOK chart.

The U.S. dollar has a significant influence on both currencies. For this reason it is necessary to take into account the major U.S. economic indicators for the correct prediction of a future course of this financial instrument. These indicators include: the discount rate, GDP, unemployment, new created workplaces indicator and many others. It is necessary to note that discussed currencies could respond with different speed on changes in the U.S. economy, therefore, NZDNOK currency pair may be a specific indicator of change at these currencies.

When trading on the NZDNOK trading instrument, it is necessary to take into account many features of the New Zealand economy, such as GDP, the discount rate, economic activity, the level of trade with other countries and many others. New Zealand is the largest producer of wool in the world, as well as its products. Therefore it is necessary to know the detail information about this indicator of New Zealand economy. It should be noted that New Zealand's economy is highly dependent on its main partners - the U.S., Australia and the Asia-Pacific. For this reason, you should also take into account a variety of economic indicators of main trading partners of New Zealand.

Norway is one of the leading industrial-agrarian countries. The country occupies the first positions on such economic indicators as quality of life and personal income level. Norway is the third largest producer and exporter of oil and gas. The main source of income of this Scandinavian country is the export of energy resources. In addition, Norway is the leading country in electrometallurgy, electrical engineering, mechanical engineering, etc. In addition, the Norwegian industry is a leading manufacturer of offshore drilling platforms for oil and gas. Also, Norway is a leader in mining and processing a variety of seafood, which are in high demand worldwide, especially in European countries.

This trading instrument is relatively illiquid if we'll compare it with major currency pairs, such as: EURUSD, USDCHF, GBPUSD and USDJPY. Therefore, when you make a prognosis for the financial instrument, you should primarily focus on those currency pairs that include a U.S. dollar in tandem with each of the considered currencies.

If you trade cross rates, it is necessary to remember that brokers are usually set a higher spread than the more popular currency pairs, so before you start working with the cross-rates, it should be carefully acquainted with the conditions offered by the broker to trade with specified trade instrument.
