

Machinations with bonuses is getting profit from non-trade operations with the bonuses. Machinations with bonuses means using of various fraudulent methods to obtain profits through bonuses. These actions although theoretically valid, but is not highly appreciated by the Company. The purpose of bonuses is to enable the trader to prove himself, giving him extra incentive to trade, which is very useful both to the trader and the Company, as in this case, both parties benefiting. A more reasonable option for a trader to improve his trading system, taking advantage of all opportunities given bonuses allocated to the Company for growth professionally.
