

Margin Call is a requirement to increase the broker's lien. This situation occurs in the case of strong deposit drawdown by trader, when there are no sufficient funds to brokers insurance. Dealing Center informs the trader about the obligation of funding his account in order to avoid closing all open positions. The deposit replenishment is necessary to compensate the losses from open positions that have become unprofitable due to price fluctuations in not favorable direction. The specific value of the level of Margin Level is indicated on the website.
