Spread is the difference between bid and ask prices (bid and ask). Spread is an income of the Company. Spread is a sort of commission charged by the Company for any financial transaction committed by the Client to buy or sell a financial instrument. The size of the spread set by the company, with a minimum volume sets it for the client, the client as more advantageous to have the specifications of the contract to the lowest spread. The volume of the spread is lower for highly liquid products. Spread size increases as the liquidity of the goods. Spread is also higher in volatile markets. Spread size is chosen in such a way that it volume was minimal. Spread size is specified in the contract specifications are available on the Company's website.
