

The screenshot shows a window titled "Add account" with a close button (X) in the top right corner. Inside the window, there is a sub-header "Add account" in blue. Below this, there are several form fields: "Account type" with a dropdown menu showing "Micro", "Currency" with a dropdown menu showing "USD", "Leverage" with a dropdown menu showing "100", "Password" with an empty text box, "Password again" with an empty text box, and "Agreement" with an unchecked checkbox. At the bottom of the form, there are two buttons: "Get Bonus" and "Add account".

A new window was opened. Here you can open the account you will work with.

Choose account type, currency and the leverage you will work with.

Enter your password (it contains Latin letters and digits) and read the user agreement. After that press the button «Add account».

The screenshot shows the same "Add account" window, but with some changes. The "Password" and "Password again" fields now contain eight dots each, indicating that a password has been entered. The "Agreement" checkbox is now checked, and a green checkmark is visible next to it. The "Add account" button is still present at the bottom right.

Your account number and the password will be presented in a new window. Write them down in a safe place.
